

# FIVALI SHOULDER SUPPORT BRACE FOR DISLOCATION PREVENTION AND RECOVERY

## WEARING INSTRUCTIONS

### Step1

Put on the shoulder brace to fit

### Step2

Fasten the chest strap to a comfortable tightness

### Step3

Adjust the side buckles so that the support straps fit snugly and do not interfere with movement

### Step4

Adjust the three elbow straps to fit in place

### Step5

Adjust the Velcro on the cuffs to the proper tightness

## BEFORE USING THE PRODUCT, PLEASE READ THE FOLLOWING INSTRUCTIONS ⚠

**USE PROCESS:** The degree of tightness of the immobilizer band should be determined by the level of medical condition at the time of use. The application time should follow the doctor's instructions. If you experience any pain or abnormal sensation during use, please stop using it immediately.

**CLEANING:** Before cleaning, please remember to remove any removable components or inserts from the shoulder brace. To clean, hand wash only with clean water, allowing air to dry naturally. Avoid excessive pulling or stretching of the fabric, which may result in tearing or distortion.

**STORAGE:** Keep it clean when in use and store it in a dry and ventilated place, taking care to protect it from moisture.

**REGULAR INSPECTION:** Regularly check whether the shoulder brace is firm and the adhesive fasteners are safe and reliable, if any problem is found, please repair and replace it in time.

## Wearing Method 1 (Sling Wearing Steps) :

Step6

Wrap the strap around your arm and buckle it

Step7

Adjust the tightness of the buckle so that it holds the arm better

Step8

Finish!

## Wearing Method 2 (Armpit Pillow Wearing Steps) :

Step6

Adjust the position of the armpit pillow so that it supports the injured shoulder well

Step7

Button up the front and back of the armpit pillows

Step8

Finish!
